## Problem list

| Problem                                  | Code     | Status             | Severity          | Onset      | Details                                  |
|------------------------------------------|----------|--------------------|-------------------|------------|------------------------------------------|
| Hypertensive disorder, systemic arterial | 38341003 | active · confirmed | Moderate severity | 2015-06-02 |                                          |
| Diabetes mellitus type 2                 | 44054006 | active · confirmed |                   | 2019-11-20 | Managed with diet alone until late 2019. |

## Allergies and intolerances

| Substance / situation | Code      | Status             | Criticality | Reaction                    | Details                                                     |
|-----------------------|-----------|--------------------|-------------|-----------------------------|-------------------------------------------------------------|
| Penicillin            | 764146007 | active · confirmed | high        | Eruption of skin · moderate | allergy · medication · Rash after amoxicillin in childhood. |

## Medication summary

| Medicine  | ATC     | Status | Dosage                                                                                                                                                              | Since      | Details |
|-----------|---------|--------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------|---------|
| ramipril  | C09AA05 | active | 5 mg orally once daily (dose 5 mg · Oral use · once per day)                                                                                                        | 2015-06-10 |         |
| metformin | A10BA02 | active | 500 mg orally twice daily with meals (dose 500 mg · Oral use · twice per day · max 2000 mg per 1 d · With or after food · Take with breakfast and the evening meal) | 2019-12-01 |         |

## History of immunizations

| Vaccine            | ATC   | Status    | Date       | Details |
|--------------------|-------|-----------|------------|---------|
| influenza vaccines | J07BB | completed | 2025-10-14 | dose 1  |

## Results

| Test                                         | LOINC   | Result       | Status | Date       | Details             |
|----------------------------------------------|---------|--------------|--------|------------|---------------------|
| Hemoglobin A1c/Hemoglobin.total in Blood     | 4548-4  | 7.1 % · High | final  | 2026-08-18 | ref 4 to 6 %        |
| Creatinine [Moles/volume] in Serum or Plasma | 14682-9 | 78 umol/L    | final  | 2026-08-18 | ref 45 to 84 umol/L |

## Plan of care

*Review blood pressure and HbA1c in three months. Annual diabetic eye screening due in March.*
